salon

Before and after treatment

At Locks and Lashes we value the importance of preparing our clients for their upcoming laser hair removal or skin rejuvenation treatment. This information not only allows our clients to know what to expect from their treatment, how to care for the treated area but also to book their session at the best time for them.

Before Treatment:

Please do not wax, tweeze, use electrolysis or any hair removal creams for the 3 weeks prior to all hair removal treatments.

24 hours after treatment:

- Do not take hot baths
- Do not put make-up on (if you had the hair removed on your face)
- Wear comfortable loose clothes so not to irritate the treated area
- Avoid contact with chlorine (swimming-pools, whirl tubs etc.)
- If the area you treated feels hot, apply cold compresses
- Scratching the area may cause infection. To release some of the itchiness, an antibiotic cream can be used (ex: Polysporin)

Use your regular moisturizer after 24 hours during the following 48 hours

During the whole period of treatments:

- Do not expose the area under treatment to sun (natural or artificial) during the entire period of treatments. Use sunscreen protection with a minimum of SPF 30 if you are outdoors.

Your next appointment will be in four to five weeks.

Should you have to re- schedule your appointment, please call us at 604-943-2511.
